Hellgate Health Enhancement Policy

High school health education provides the basis for continued methods of developing knowledge, concepts, skills, behavior, and attitudes related to student health and well-being. This semester course includes the major content areas (fitness and nutrition, mental health and wellness, drug and alcohol education and sexual health and relationships) in a planned, sequential comprehensive health education curriculum as expressed in the Montana State Standards. Students are provided with opportunities to explore the effect of health behaviors on their own quality of life. This course assists students in understanding that health is a lifetime commitment by analyzing individual risk factors and health decisions. A variety of instructional strategies are used to develop the following skills:

- Analyzing influences
- Accessing valid and reliable information, products, and services
- Interpersonal communication
- Decision-making
- Goal setting
- Self-management
- Advocacy for self and other
