

iEEL Final Project (target 13) rubric

category	A (4)	B (3)	C (2)	D (1)
Content	Details from all unit topics included, including plate tectonics, Earth structure, geologic time, river erosion and deposition, population limiting factors, and evolution (influence of islands on gene pool, influence of predators on gene pool). Clearly shows the relationship between the evolution of Earth and life.	Includes five or six of these topics, or a cursory treatment of all seven with insufficient detail. The relationship between the evolution of Earth and life is not shown clearly.	Includes three or four of these topics or little more than a list of the topics with tenuous connections.	Includes one or two of these topics with little detail or connection
Organization	Must be very well organized with each of the topics easy to see and follow. Connections between topics must be clear.	Well organized but with connections missing or unclear	Unorganized or with missing connections	A hot mess
Presentation	Style is creative and eye-catching	Some creativity shown in the presentation	Basic presentation	A hot mess
