Philosophical foundations and lifelong goals

The philosophical foundations and lifelong goals establish the basis for the new standards and illuminate artistic literacy by expressing the overarching common values and expectations for learning in arts education across the five arts disciplines. For a full explanation of artistic literacy, please see the [Conceptual Framework](#).

Philosophical Foundation	Lifelong Goals
The Arts as Communication	
In today's multimedia society, the arts are the media, and therefore provide powerful and essential means of communication. The arts provide unique symbol systems and metaphors that convey and inform life experience (i.e., the arts are ways of knowing).	Artistically literate citizens use a variety of artistic media, symbols and metaphors to independently create and perform work that expresses and communicates their own ideas, and are able to respond by analyzing and interpreting the artistic communications of others.
The Arts as Creative Personal Realization	
Participation in each of the arts as creators, performers, and audience members enables individuals to discover and develop their own creative capacity, thereby providing a source of lifelong satisfaction.	Artistically literate citizens find at least one arts discipline in which they develop sufficient competence to continue active involvement in creating, performing, and responding to art as an adult.
The Arts as Culture, History, and Connectors	
Throughout history, the arts have provided essential means for individuals and communities to express their ideas, experiences, feelings, and deepest beliefs. Each discipline shares common goals, but approaches them through distinct media and techniques. Understanding artwork provides insights into individuals' own and others' cultures and societies, while also providing opportunities to access, express, and integrate meaning across a variety of content areas.	Artistically literate citizens know and understand artwork from varied historical periods and cultures, and actively seek and appreciate diverse forms and genres of artwork of enduring quality/significance. They also seek to understand relationships among the arts, and cultivate habits of searching for and identifying patterns, relationships between the arts and other knowledge.
Arts as Means to Wellbeing	
Participation in the arts as creators, performers, and audience members (responders) enhances mental, physical, and emotional wellbeing.	Artistically literate citizens find joy, inspiration, peace, intellectual stimulation, meaning, and other life-enhancing qualities through participation in all of the arts.
The Arts as Community Engagement	
The arts provide means for individuals to collaborate and connect with others in an enjoyable inclusive environment as they create, prepare, and share artwork that bring communities together.	Artistically literate citizens seek artistic experience and support the arts in their local, state, national, and global communities.

MISSION

To ensure every student achieves his or her full potential, regardless of circumstance and ability.

VISION

We communicate; we collaborate; we think critically; and we create. We are Missoula County Public Schools - educational leaders in a global society - fostering uncompromising excellence and empowering all learners.

CORE BELIEFS

- 1) EVERY CHILD deserves to be challenged, equipped, and prepared for life beyond school.
- 2) INNOVATIVE, COMMITTED TALENT – leadership, teachers, and staff – drive success in the classroom and beyond.
- 3) LEARNING ENVIRONMENTS must continually evolve to be engaging, safe and up-to-date.
- 4) STRONG COMMUNITIES start with a strong, public school system.

GOALS

- 1) RESTRUCTURE ORGANIZATION & FACILITIES: Restructure the facilities and organization to become more efficient and effective in support of 21st century learning.
- 2) STUDENT ACHIEVEMENT FOR ALL: Achievement and graduation for all students regardless of their circumstances and abilities.
- 3) QUALITY PROFESSIONAL DEVELOPMENT: Define and implement a quality professional development program that encompasses best practices and supports the needs of all staff. Refine and implement a quality evaluation and supervision program for all staff.
- 4) CULTIVATE INVOLVEMENT: Cultivate and enhance staff, student, parent, business and community involvement.

MEETING DIVERSE STUDENT NEEDS

Students with diverse needs--those with unique abilities and/or disabilities--will have differentiated opportunities to achieve targets, benchmarks, and standards at rates and in manners consistent with their needs. Accommodations and modifications will be implemented to ensure that all students have the opportunity to meet established learning goals and to gain full access to the curriculum.

The needs of struggling learners will be met in a variety of ways in the classroom both through informal intervention and formally prescribed intervention, as necessary.

Gifted students and students of high ability require, at times, differentiated instruction and additional challenge beyond what the standard curriculum can provide. These provisions can include but are not limited to: more challenging content or assignments, critical and higher level thinking skills, instructional grouping, extension activities, and independent research.

TECHNOLOGY

The integration of curriculum and technology is essential to prepare today's students for participation in a viable democratic society. Therefore, the MCPS Fine Arts Curriculum Committee views technology as integral to the Fine Arts curriculum.

LIBRARY MEDIA

Teacher librarians play an essential role in curriculum implementation. They are important instructional partners and consultants in supporting and expanding existing curricula. As information specialists, teacher librarians work collaboratively with students, teachers, administrators, and parents to:

- Provide knowledge of availability and suitability of information resources to support the implementation of Montana and MCPS Standards. This is particularly relevant with the Indian Education for All Law.
- Partner in educating students, developing curricula, and integrating resources into teaching and learning.
- Serve as experts in organizing, synthesizing, and communicating information. Acquisition, organization, and dissemination of resources to support the curricular areas through the library media center are cost-effective methods for the entire school district.
- Teach and integrate literature and information skills into the curriculum. They plan and teach collaboratively based on the needs of the student.

INDIAN EDUCATION FOR ALL

Missoula County Public Schools is committed to developing for all students an understanding of American and Montana Indian people and their histories, fostering respect for their cultures. In view of the unique role of the American Indian peoples in the development of the United States and the experience of Montana tribes in particular, their history and culture will be integrated wherever appropriate in the instruction of MCPS students, in accordance with the state constitution, statutes, and curriculum standards.

ESSENTIAL UNDERSTANDINGS REGARDING MONTANA INDIANS

1. There is great diversity among the 12 tribal Nations of Montana in their languages, cultures, histories, and governments. Each Nation has a distinct and unique cultural heritage that contributes to modern Montana.
2. There is great diversity among individual American Indians as identity is developed, defined, and redefined by many entities, organizations, and people. There is a continuum of Indian identity ranging from assimilated to traditional and this is unique to each individual. There is no generic American Indian.
3. The ideologies of Native traditional beliefs and spirituality persist into modern day life as tribal cultures, traditions and languages are still practiced by many American Indian people and are incorporated into how tribes govern and manage their affairs. Additionally, each tribe has their own oral history beginning with their genesis that is as valid as written histories. These histories pre-date the “discovery” of North America.
4. Reservations are land that have been reserved by the tribes for their own use through treaties and was not “given” to them. The principle that land should be acquired from the Indians only through their consent with treaties involved three assumptions:
 - a. That both parties to treaties were sovereign powers.
 - b. Those Indian tribes had some form of transferable title to the land.
 - c. That acquisition of Indian lands was solely a government matter not to be left to individual colonists.
5. There were many federal policies put into place throughout American history that have impacted Indian people and shape who they are today. Much of Indian history can be related through several major federal policy periods.
6. History is a story most often related through the subjective experience of the teller. Histories are being rediscovered and revised. History told from an Indian perspective conflicts with what most of mainstream history tells us.
7. Under the American legal system, Indian tribes have sovereign powers separate and independent from the federal and state governments. However, the extent and breadth of tribal sovereignty is not the same for each tribe.

Academic Freedom

The Board recognizes and supports Academic Freedom as necessary for an environment conducive to the free exchange of ideas and learning.

Academic Freedom is the view that if teachers are to promote the growth of knowledge, they require the freedom to teach and conduct inquiry without fear of sanction or reprisals should they present an unpopular or controversial idea.

Teachers shall help students learn to objectively and respectfully examine differences of opinion, analyze and evaluate facts and their sources, and form their own reasoned judgments about the relative value of competing perspectives.

The Board directs the teaching staff to:

- Refrain from using one's classroom position to promote one's own ideology or any partisan point of view.
- Ensure that issues presented pertain to course objectives.
- Provide students opportunities to develop critical thinking: that is the ability to detect propaganda and to distinguish between fact, opinion and misinformation.
- Respect each student's right to form, choose, hold and/or change an opinion or belief.
- Create an environment in which students are free to form judgments independently.

Any person may file complaints pursuant to this policy through Board Policy 4310P, the uniform grievance procedure.

This policy may not be used to challenge educational materials themselves. Please see:
