Good afternoon,

I am writing to strongly encourage the school board to move our spring break to April. I am a middle school teacher and some of my courses are 1 quarter long. This school year we will come back from spring break and have two weeks to finish up these classes. This is challenging for a number of reasons but the discontinuity makes it difficult for students to remember what we were learning before the break. The later spring break option would make it so that the 3rd quarter would end right before spring break and we would start the 4th quarter when we return.

Thank you for your time and consideration,
Sarah
