To Whom It May Concern:

The District received the following questions in regards to the Willard Alternative High School RFQ due April 11, 2017:

1.) "Is there any work being done on a historic occupied structure, or is the project only comprised of the demolition of the existing school and then the construction of a new one?"

Answer: No work will be performed on the current structure other than limited selective demolition for salvage and re-use. The project is comprised of the construction of the new school and demolition of the current school by July, 2018.

2.) "Will the new [school] be constructed on a different section of the same site while the existing school is in use?"

Answer: Yes.

3.) "If the new school is ready to occupy by July 2018, is the demolition of the existing school to be completed by this date as well?"

Answer: Yes, the primary parking lot will need to be built where the current school is located.

Thank you,

A handwritten signature in black ink, appearing to read "Burley McWilliams", followed by a horizontal line.
